

Revision date : 2017/06/14 Page: 1/10

Version: 3.1 (30229846/SDS\_GEN\_US/EN)

#### 1. Identification

#### Product identifier used on the label

# Irganox® PS 802 FL

#### Recommended use of the chemical and restriction on use

Unsuitable for use: This material is not intended for use in products for which prolonged contact with mucous membranes, body fluids or abraded skin, or implantation within the human body, is specifically intended, unless the finished product has been tested in accordance with nationally and internationally applicable safety testing requirements. Because of the wide range of such potential uses, we are not able to recommend this material as safe and effective for such uses and assume no liability for such uses.

Recommended use\*: stabilizer

#### Details of the supplier of the safety data sheet

Company:
BASF CORPORATION
100 Park Avenue
Florham Park, NJ 07932, USA

Telephone: +1 973 245-6000

# **Emergency telephone number**

CHEMTREC: 1-800-424-9300

BASF HOTLINE: 1-800-832-HELP (4357)

#### Other means of identification

Synonyms: Long chain aliphatic derivative of a thioester

#### 2. Hazards Identification

# According to Regulation 2012 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

#### Classification of the product

No need for classification according to GHS criteria for this product.

<sup>\*</sup> The "Recommended use" identified for this product is provided solely to comply with a Federal requirement and is not part of the seller's published specification. The terms of this Safety Data Sheet (SDS) do not create or infer any warranty, express or implied, including by incorporation into or reference in the seller's sales agreement.

Revision date: 2017/06/14 Page: 2/10 Version: 3.1 (30229846/SDS GEN US/EN)

#### Label elements

The product does not require a hazard warning label in accordance with GHS criteria.

#### Hazards not otherwise classified

If applicable information is provided in this section on other hazards which do not result in classification but which may contribute to the overall hazards of the substance or mixture.

#### Labeling of special preparations (GHS):

This product is not combustible in the form in which it is shipped by the manufacturer, but may form a combustible dust through downstream activities (e.g. grinding, pulverizing) that reduce its particle size.

# 3. Composition / Information on Ingredients

#### According to Regulation 2012 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

This product does not contain any components classified as hazardous under the referenced regulation.

#### 4. First-Aid Measures

#### **Description of first aid measures**

#### **General advice:**

Remove contaminated clothing.

#### If inhaled:

Keep patient calm, remove to fresh air, seek medical attention.

#### If on skin:

Wash thoroughly with soap and water.

If irritation develops, seek medical attention.

#### If in eyes:

Wash affected eyes for at least 15 minutes under running water with eyelids held open.

If irritation develops, seek medical attention.

#### If swallowed:

Rinse mouth and then drink plenty of water. Do not induce vomiting. Immediate medical attention required.

## Most important symptoms and effects, both acute and delayed

Symptoms: The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11.

Further important symptoms and effects are so far not known.

#### Indication of any immediate medical attention and special treatment needed

Revision date: 2017/06/14 Page: 3/10 Version: 3.1 (30229846/SDS GEN US/EN)

Note to physician

Treat according to symptoms (decontamination, vital functions), no

known specific antidote.

# 5. Fire-Fighting Measures

#### **Extinguishing media**

Suitable extinguishing media:

dry powder, foam

Unsuitable extinguishing media for safety reasons:

carbon dioxide

Additional information:

Avoid whirling up the material/product because of the danger of dust explosion.

#### Special hazards arising from the substance or mixture

Hazards during fire-fighting:

harmful vapours

Evolution of fumes/fog. The substances/groups of substances mentioned can be released in case of fire.

### Advice for fire-fighters

Protective equipment for fire-fighting:

Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

#### **Further information:**

Dusty conditions may ignite explosively in the presence of an ignition source causing flash fire.

# **Impact Sensitivity:**

Remarks: Based on the chemical structure there is no shock-sensitivity.

#### 6. Accidental release measures

### Further accidental release measures:

Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Avoid the formation and build-up of dust - danger of dust explosion. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition.

#### Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Use personal protective clothing.

#### **Environmental precautions**

Contain contaminated water/firefighting water. Do not discharge into drains/surface waters/groundwater.

#### Methods and material for containment and cleaning up

Nonsparking tools should be used.

Revision date: 2017/06/14 Page: 4/10 Version: 3.1 (30229846/SDS\_GEN\_US/EN)

# 7. Handling and Storage

# Precautions for safe handling

Breathing must be protected when large quantities are decanted without local exhaust ventilation.

Closed containers should only be opened in well-ventilated areas. Avoid dust formation. Do not use any sparking tools.

#### Protection against fire and explosion:

Avoid dust formation. Dust in sufficient concentration can result in an explosive mixture in air. Handle to minimize dusting and eliminate open flame and other sources of ignition. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Refer to NFPA 654, Standard for the Prevention of Fire and Dust Explosions from the Manufacturing, Processing, and Handling of Combustible Particulate Solids (2013 Edition) for safe handling.

Dust explosion class: Dust explosion class 1 (Kst-value >0 up to 200 bar m s-1).

### Conditions for safe storage, including any incompatibilities

No applicable information available.

Further information on storage conditions: Keep container tightly closed and dry; store in a cool place.

# 8. Exposure Controls/Personal Protection

No occupational exposure limits known.

#### Advice on system design:

It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Use only appropriately classified electrical equipment and powered industrial trucks.

#### Personal protective equipment

#### Respiratory protection:

Breathing protection if breathable aerosols/dust are formed. Wear respiratory protection if ventilation is inadequate. Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator.

Observe OSHA regulations for respirator use (29 CFR 1910.134).

# Hand protection:

Wear chemical resistant protective gloves.

#### Eye protection:

Safety glasses with side-shields.

#### **Body protection:**

Body protection must be chosen based on level of activity and exposure.

Revision date: 2017/06/14 Page: 5/10 Version: 3.1 (30229846/SDS GEN US/EN)

#### General safety and hygiene measures:

Wear protective clothing as necessary to minimize contact. Handle in accordance with good industrial hygiene and safety practice. Handle in accordance with good industrial hygiene and safety practice.

# 9. Physical and Chemical Properties

Form: flakes, crystalline Odour: faint odour

Odour threshold: No applicable information available.

Colour: white pH value: 6

(1%(m))

(as suspension)

Melting point: 64 - 67 °C Boiling point: not applicable

Sublimation point: No applicable information available.

Flash point: 257 °C (DIN 51584)
Flammability: not highly flammable (Directive

92/69/EEC, A.10)

Lower explosion limit: For solids not relevant for

classification and labelling.

Upper explosion limit: For solids not relevant for

classification and labelling.

Autoignition: 360 °C

360 °C

Vapour pressure: 0.0000066 Pa

(20 °C)

Density: 0.98 g/cm3

(20°C)

Relative density: No applicable information available.

Bulk density: 475 - 525 kg/m3

Vapour density: No applicable information available.

Partitioning coefficient n- > 6

octanol/water (log Pow):

Self-ignition Based on its structural properties the

temperature: product is not classified as self-

igniting.

The value has not be determined because of the low risk of self-ignition in consequence of the low melting

(calculated)

point.

Thermal decomposition: > 350 °C Viscosity, dynamic: not determined

Viscosity, kinematic: No applicable information available.

Solubility in water: < 1 mg/l (20 °C)

Solubility (quantitative): No applicable information available. Solubility (qualitative): No applicable information available. Evaporation rate: The product is a non-volatile solid.

Other Information: If necessary, information on other physical and chemical

parameters is indicated in this section.

#### 10. Stability and Reactivity

#### Reactivity

Revision date: 2017/06/14 Page: 6/10 Version: 3.1 (30229846/SDS GEN US/EN)

No hazardous reactions if stored and handled as prescribed/indicated.

Corrosion to metals:

No corrosive effect on metal.

Oxidizing properties:

Based on its structural properties the product is not classified as oxidizing.

Dust explosivity characteristics:

Kst: 180 m.bar/s Revaluation 2015

Dust explosion class:

Dust explosion class 1 (Kst-value >0 up to 200 bar m s-1) (St 1)

Minimum ignition energy:

No data available.

Reactions with water/air:

Reaction with:	water
Flammable gases:	no
Toxic gases: Corrosive gases:	no no
Smoke or fog:	no
Peroxides:	no
Reaction with:	air
Flammable gases:	no
Toxic gases:	no
Corrosive gases:	no
Smoke or fog:	no

Formation of flammable gases:

Remarks:

Peroxides:

Forms no flammable gases in the

presence of water.

no

# **Chemical stability**

The product is stable if stored and handled as prescribed/indicated.

#### Possibility of hazardous reactions

The product may contain explosive fine dust or such dust may be produced by abrasion during transport or product transfer.

#### Conditions to avoid

Avoid dust formation. Avoid deposition of dust. Avoid all sources of ignition: heat, sparks, open flame. Avoid electro-static charge.

#### Incompatible materials

strong acids, strong bases, strong oxidizing agents

#### Hazardous decomposition products

Decomposition products:

Hazardous decomposition products: No hazardous decomposition products if stored and handled as prescribed/indicated.

Thermal decomposition:

Revision date: 2017/06/14 Page: 7/10 Version: 3.1 (30229846/SDS GEN US/EN)

> 350 °C

# 11. Toxicological information

## Primary routes of exposure

Routes of entry for solids and liquids are ingestion and inhalation, but may include eye or skin contact. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

# **Acute Toxicity/Effects**

Acute toxicity

Assessment of acute toxicity: No known acute effects.

<u>Oral</u>

Type of value: LD50

Species: rat

Value: > 5,000 mg/kg (OECD Guideline 423)

Dermal

Type of value: LD50

Species: rat

Value: > 2,000 mg/kg (OECD Guideline 402)

The value meets the highest applied test concentration. No mortality was observed.

#### Assessment other acute effects

Assessment of STOT single:

Based on the available information there is no specific target organ toxicity to be expected after a single exposure.

#### Irritation / corrosion

Assessment of irritating effects: Not irritating to eyes and skin.

Skin

Species: rabbit Result: non-irritant

Method: OECD Guideline 404

<u>Eye</u>

Species: rabbit Result: non-irritant

Method: OECD Guideline 405

# Sensitization

Assessment of sensitization: Skin sensitizing effects were not observed in animal studies.

other

Species: guinea pig Result: Non-sensitizing.

#### **Aspiration Hazard**

No aspiration hazard expected.

## **Chronic Toxicity/Effects**

Revision date: 2017/06/14 Page: 8/10 Version: 3.1 (30229846/SDS\_GEN\_US/EN)

#### Repeated dose toxicity

Assessment of repeated dose toxicity: The substance may cause damage to the heart after repeated ingestion of high doses, as shown in animal studies. Observed effects were reversible. The product has not been tested. The statement has been derived from substances/products of a similar structure or composition.

#### **Genetic toxicity**

Assessment of mutagenicity: Based on the ingredients, there is no suspicion of a mutagenic effect. Genetic toxicity in vitro: OECD Guideline 473 Cytogenetic assay negative Ames-test negative

### Carcinogenicity

Assessment of carcinogenicity: The whole of the information assessable provides no indication of a carcinogenic effect.

None of the components in this product at concentrations greater than 0.1% are listed by IARC; NTP, OSHA or ACGIH as a carcinogen.

#### Reproductive toxicity

Assessment of reproduction toxicity: Based on the ingredients, there is no suspicion of a toxic effect on reproduction.

#### Symptoms of Exposure

The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11.

Further important symptoms and effects are so far not known.

#### 12. Ecological Information

#### **Toxicity**

#### Aquatic toxicity

Assessment of aquatic toxicity:

There is a high probability that the product is not acutely harmful to aquatic organisms. No toxic effects occur within the range of solubility. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.

#### Toxicity to fish

LC50 (96 h) > 100 mg/l, Brachydanio rerio (OECD Guideline 203)

#### Aquatic invertebrates

EC50 (24 h) > 100 mg/l, Daphnia magna (Screening (style of OECD 202))

#### Aquatic plants

EC50 (72 h) 60 mg/l, Scenedesmus subspicatus (Guideline 92/69/EEC, C.3)

### Microorganisms/Effect on activated sludge

#### Toxicity to microorganisms

OECD Guideline 209 activated sludge/EC50 (3 h): > 100 mg/l

#### Persistence and degradability

Assessment biodegradation and elimination (H2O)

# Safety Data Sheet

Irganox® PS 802 FL

Revision date: 2017/06/14 Page: 9/10 Version: 3.1 (30229846/SDS GEN US/EN)

Readily biodegradable (according to OECD criteria).

#### Elimination information

71 % BOD of the ThOD (28 d) (OECD 301D; EEC 92/69, C.4-E) (aerobic, activated sludge, domestic)

#### **Photodegradation**

t<sub>1/2</sub> (Indirect photolysis) 5.6 h; OH radical (calculated)

#### Bioaccumulative potential

#### Assessment bioaccumulation potential

Significant accumulation in organisms is not to be expected.

# Mobility in soil

#### Assessment transport between environmental compartments

The substance will not evaporate into the atmosphere from the water surface.

Adsorption to solid soil phase is expected.

# 13. Disposal considerations

#### Waste disposal of substance:

Do not discharge into drains/surface waters/groundwater. Dispose of in accordance with national, state and local regulations.

#### Container disposal:

Dispose of in accordance with national, state and local regulations. Recommend crushing, puncturing or other means to prevent unauthorized use of used containers.

## 14. Transport Information

# Land transport

**USDOT** 

Not classified as a dangerous good under transport regulations

#### Sea transport

**IMDG** 

Not classified as a dangerous good under transport regulations

# Air transport IATA/ICAO

Not classified as a dangerous good under transport regulations

# 15. Regulatory Information

#### **Federal Regulations**

#### Registration status:

Chemical TSCA, US released / listed

Revision date: 2017/06/14 Page: 10/10 Version: 3.1 (30229846/SDS GEN US/EN)

EPCRA 311/312 (Hazard categories): Not hazardous;

NFPA Hazard codes:

Health: 1 Fire: 1 Reactivity: 0 Special:

**HMIS III rating** 

Health: 1 Flammability: 1 Physical hazard:0

#### 16. Other Information

#### SDS Prepared by:
